Title Detailed Statistics on Volleyball Matches

Version 0.2.0

Maintainer Viktor Bozhinov <mail@viktor-bozhinov.de>

Description Volleyball match statistics of the German volleyball first division league (seasons 2013/2014 to 2018/2019). The data has been collected from the official volleyball first division homepage (<www.volleyball-bundesliga.de>) and contains information on teams, staff, sets, matches, and player-in-match statistics (extracted automatically from the official match reports).

matches   *Matches data*

Description

A dataset containing all matches of the German first division volleyball league for each season starting in 2013/2014 and ending in 2018/2019. Note that all matches are included twice in the dataset, i.e., from the perspective of the home team and from the perspective of the away team.

Usage

```
matches
```

Format

Data frame with 3392 rows and 12 columns.

league_gender Men or women's league.

season_id ID for each season unique within league_gender. It consists of the last two digits of the season years, e.g., the season_id of season 2014/2015 equals 1415.

competition_stage Stage of the competition, i.e., main round or play-offs.

match_id Official VBL match id. Unique within seasons.

match Factor variable identifying whether observation is from the home team's perspective or from the away team's perspective.

match_day Match day (only main round, see competition_stage).

date_time POSIXct date-time variable of the match.

spectators Number of spectators in the gym.

match_duration Length of match in minutes.

team_id Team identifier which is unique across all teams and seasons.

team_name Official name of the team. Note that VCO Berlin has a team in men's and women's league.

set_won Number of sets won by the team.

matchstats   *Matchstats data*

Description

A dataset containing match-player level statistics of the German first division volleyball league for each match and each season starting in 2013/2014 and ending in 2018/2019.

Usage

```
matchstats
```

Format

Data frame with 32755 rows and 23 columns.

league_gender Men or women's league.

season_id ID for each season unique within league_gender. It consists of the last two digits of the season years, e.g., the season_id of season 2014/2015 equals 1415.

match_id Official VBL match id. Unique within seasons.

team_id Team identifier which is unique across all teams and seasons.

player_id Player identifier which is unique within a team in a season. This identifier equals to the shirt number of the player. However, in cases where more than one player has the same shirt number, the identifier is replaced by a 3-digit number starting at 100.

shirt_number Official shirt number, not unique within teams (see player_id).

vote Score computed according to the DataVolley settings. NA if not reported as numeric in the match report.

pt_tot Total points scored.

pt_bp Total break points scored.

pt_profloss Won minus lost points. More precisely, this variable is computed according to the following equation: serv_pt + att_pt + blo_pt - serv_err - rec_err - att_err - att_blo.

serv_tot Total number of serves.

ser_err Number of serving errors.

serv_pt Number of scored points at service, e.g., aces.

rec_tot Number of receptions.

rec_err Number of errors in reception.

rec_pos Share of positive receptions.

rec_per Share of perfect receptions.

att_tot Number of total attacks.

att_err Number of failed attacks.

att_blo Number of blocked attacks.

att_pt Number of successful attacks.

att_per Share of successful attacks.

blo_pt Number of successful blocks.

match_adresses   *Match adresses data*

Description

A dataset containing name, adress, and coordinates of the gym of each match in the German first
division volleyball league between 2013/2014 and ending in 2018/2019.

Usage

```
match_adresses
```

Format

Data frame with 1718 rows and 6 columns.

league_gender Men or women's league.

season_id ID for each season unique within league_gender. It consists of the last two digits of the
season years, e.g., the season_id of season 2014/2015 equals 1415.

match_id Official VBL match id. Unique within seasons.

gym Official name of arena.

adress ZIP code and city.

lon Longitude of arena.

lat Latitude of arena.

players	*Players data*

Description

A dataset containing attributes of all players in the German first division volleyball league for each season starting in 2013/2014 and ending in 2018/2019.

Usage

```
players
```

Format

Data frame with 1853 rows and 13 columns.

league_gender Men or women's league.

season_id ID for each season unique within league_gender. It consists of the last two digits of the season years, e.g., the season_id of season 2014/2015 equals 1415.

team_id Team identifier which is unique across all teams and seasons.

team_name Official name of the team. Note that VCO Berlin has a team in men's and women's league.

player_id Player identifier which is unique within a team in a season. This identifier equals to the shirt number of the player. However, in cases where more than one player has the same shirt number, the identifier is replaced by a 3-digit number starting at 100.

shirt_number Official shirt number, not unique within teams (see player_id).

position Player's specialization

firstname First name of the player

lastname Last name of the player

gender Player's gender: male or female.

birthdate Date of birth

height Height in cm

nationality Nationality of player

sets   *Sets data*

Description

A dataset containing all matches of the German first division volleyball league for each season on set level. starting in 2013/2014 and ending in 2018/2019. Note that all sets are included twice in the dataset, i.e., from the perspective of the home team and from the perspective of the away team.

Usage

```
sets
```

Format

Data frame with 12660 rows and 9 columns.

league_gender Men or women's league.

season_id ID for each season unique within league_gender. It consists of the last two digits of the season years, e.g., the season_id of season 2014/2015 equals 1415.

match_id Official VBL match id. Unique within seasons.

match Factor variable identifying whether observation is from the home team's perspective or from the away team's perspective.

team_id Team identifier which is unique across all teams and seasons.

team_name Official name of the team. Note that VCO Berlin has a team in men's and women's league.

set Set identifier.

set_duration Length of set in minutes.

pt_set Points scored in set.

staff	*Team staff data*

Description

A dataset containing attributes of all staff members of teams in the German first division volleyball league for each season starting in 2013/2014 and ending in 2018/2019.

Usage

```
staff
```

Format

A data frame with 1214 rows and 10 variables:

league_gender Men or women's league.

season_id ID for each season unique within league_gender. It consists of the last two digits of the season years, e.g., the season_id of season 2014/2015 equals 1415.

team_id Team identifier which is unique across all teams and seasons.

team_name Official name of the team. Note that VCO Berlin has a team in men's and women's league.

firstname First name of the player

lastname Last name of the player

gender Player's gender: male or female.

birthdate Date of birth

position Person's role in the team, e.g., couch, statistician, or assistant couch.

nationality Nationality of team member.

team_adresses   *Team adresses data*

Description

A dataset containing name, adress, and coordinates of the home gym of each team in the German first division volleyball league between 2013/2014 and ending in 2018/2019.

Usage

```
team_adresses
```

Format

Data frame with 137 rows and 8 columns.

season_id ID for each season unique within league_gender. It consists of the last two digits of the season years, e.g., the season_id of season 2014/2015 equals 1415.

league_gender Men or women's league.

team_id Team identifier which is unique across all teams and seasons.

team_name Official name of the team. Note that VCO Berlin has a team in men's and women's league.

gym_adress ZIP code and city.

max_spectator Maximum capacity

lon Longitude of arena.

lat Latitude of arena.

volleystat	*volleystat: Volleyball match statistics*

Description

This packages provides data on match statistics of the German volleyball first division league (seasons 2013/2014 to 2018/2019). The data has been collected from the official volleyball first division homepage (www.volleyball-bundesliga.de) and contains information on teams, staff, sets, matches, and player-in-match statistics (extracted automatically using tabulizer from the PDFs of the official match reports).

players

A dataset containing attributes of all players in the German first division volleyball league for each season starting in 2013/2014 and ending in 2018/2019.

staff

A dataset containing attributes of all staff members of teams in the German first division volleyball league for each season starting in 2013/2014 and ending in 2018/2019.

matches

A dataset containing all matches of the German first division volleyball league for each season starting in 2013/2014 and ending in 2018/2019. Note that all matches are included twice in the dataset, i.e., from the perspective of the home team and from the perspective of the away team.

sets

A dataset containing all matches of the German first division volleyball league for each season on set level. starting in 2013/2014 and ending in 2018/2019. Note that all sets are included twice in the dataset, i.e., from the perspective of the home team and from the perspective of the away team.

matchstats

A dataset containing match-player level statistics of the German first division volleyball league for each match and each season starting 2013/2014 and ending 2018/2019.

match_adresses

A dataset containing adresses and coordinates of all matches of the German first division volleyball league for each match and each season starting 2013/2014 and ending 2018/2019.

team_adresses

A dataset containing adresses and coordinates of all teams of the German first division volleyball league for each match and each season starting 2013/2014 and ending 2018/2019.
